TAKE 5:

WHAT IS
MOBILE
MARKETING AUTOMATION?

Apsalar

What is Marketing Automation?

Marketing automation uses technology to streamline, simplify and automate digital marketing tasks. Automation platforms can be used for audience-based communications, but many of their most interesting applications are in triggered personalized communications.

What is Mobile Marketing Automation?

Mobile consumer interactions are particularly suited to marketing automation because people keep their phones with them all day, and brands can identify and leverage moments of opportunity as they occur. As brand attention to mobile has increased, and as new mobile marketing methods have been developed, more and more brands are deploying mobile marketing automation solutions. This is particularly true for app-based businesses.

Marketing Automation and Triggers

Marketing automation is often driven by individual customers taking specific actions that trigger some sort of targeted marketing event. Some examples include:

- When a user puts items in a cart but abandons before buying

- When an app user gets within a certain radius of a retail location

- If someone hasn't visited a site or app in a certain amount of time

- When someone searches for a certain class of items on a site, like airline tickets

For instance, a person who abandons a full shopping cart might receive and email or push message reminder to return and finish their transaction.

Marketing automation creates individualized marketing experiences at a scale that simply wasn't possible before. Brands create business rules based upon triggers, and then is able to deliver personalized marketing experiences without significant human effort.

Example Touchpoints for Mobile Marketing Automation

Mobile technology now offers a vast arrays of potential communications paths to leverage with mobile marketing automation. Here are the most possible:

- Push notifications
- Emails
- SMS/texts
- Message center communications
- mWallet offers
- In-app personalized experiences
- Mobile site personalization
- Landing page personalization

In each case a trigger event could lead an automation platform to deliver some message, offer or content via this communications vehicle.

Mobile Marketing Automation Use Cases

Marketing automation is an incredibly versatile tool with which to drive customer actions, especially for e-commerce and m-commerce businesses. The following chart outlines a variety of consumer actions (or…inactions) and how marketing automation and the delivery of focused messages and offers could help turn these actions into business opportunities for a brand.

● User/Customer Event	● How Automation Could Help
eStore browsing/no purchase	Get customer to visit again/transact
Cart abandon	Get customer to complete transaction
Enters within a store radius	Drive a customer visit
User purchase	Encourage more browsing/shopping
	Encourage another immediate purchase
	Get individual to trade up
	Get individual to buy related items
	Encourage a standing monthly order
Failure to visit app/site for N days	Remind user
	Offer promotion to return to the app or site
Download of information	Trigger email "lead nurture" program
User fails to install app update	Remind/incent to update app

How Apsalar and its Mobile-First DMP Improve Marketing Automation

The Apsalar DMP helps make data, profiles and audiences available to marketing automation tools more quickly and easily. By measuring in-app customer events and combining that data with mobile-web and other first party data sets, we create incredibly rich 360 profiles and can deliver real-time data on customer events.

Most DMPs have little or no visibility into customer events inside apps. Apsalar, by contrast, enables you to measure any type of consumer event for rich insight and granular marketing automation programs.

Our DataSync offering makes it possible to easily and securely share event data with leading mobile marketing automation products right from the Apsalar interface.

ABOUT TAKE 5

The Take 5 series is designed to help senior marketers learn more about data-driven customer marketing by creating short educational pieces that can be read and absorbed in less than five minutes. The main content of each Take 5 is 600 words or less to stay focused and brief. The Take 5 series will also be available as a collection – a primer on data driven customer marketing.
